

Online Learning Lessons for *Couch's Class*

Directions: Please complete the following work below for each subject. This work will count toward your final grade and must be complete to get credit for attendance.

Student Name _____

DATE: 4/22/20

ELA

Google Classroom:
Reading Comprehension-The Hummingbird
(This Assignment will last two days)

Parent Initials: _____

Math

Imagine Math Facts (multiplication) for 20 minutes. Parents MUST be aware of when you begin so that they can time you.

Parent Initials: _____

Science

Google Classroom:
Earth Day Lesson! Interactive Slides on the 3R's
(This assignment will last two days)

Parent Initials: _____

History/Social Studies

FINISH
Google Classroom:
Explorer Research Project

Parent Initials: _____

Parent Signature: _____

If you have questions, please email me. Thank you!

Teacher Hours:
9:00 am - 11:30 am
12:30 pm - 2:30 pm

Name: _____

HUMMINGBIRD

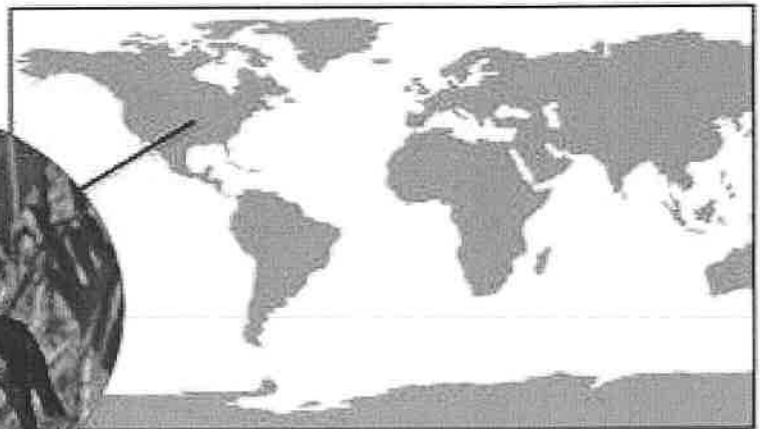

Hummingbirds are considered one of the smallest birds in the world. There are over 300 species of hummingbirds! Did you ever wonder why they are called humming birds? That is because their wings move so fast they make a humming noise.

Hummingbirds can fly in all kinds of directions. They can fly up, down, forwards, backwards, and upside down! Hummingbirds are mostly found in North and Central America. A hummingbirds diet is nectar from flowers, tree sap, and even tiny bugs.

Hummingbirds need to eat 5-8 times an hour. That's a lot of eating!

Fun Facts
Weight - They weigh about 4 grams
Size - They are between 2-4 inches
Lifespan - They average about 5 years of life

HUMMING BIRDS ARE FAST LITTLE BIRDS.

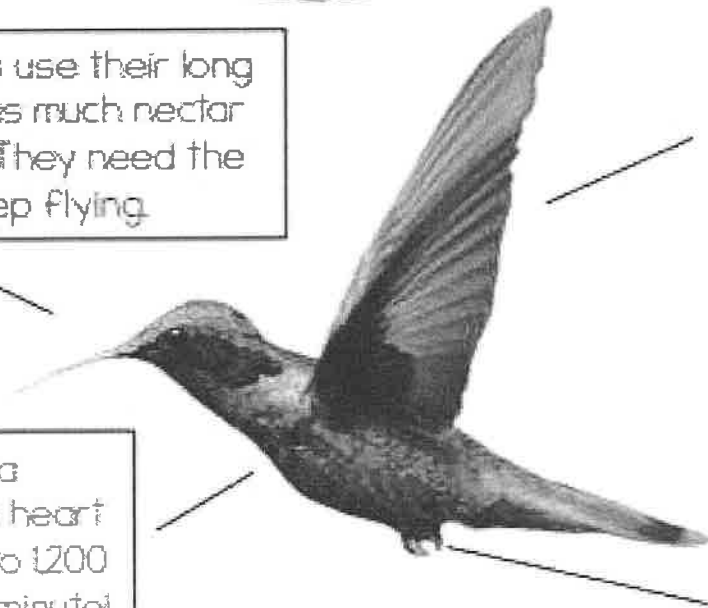

Hummingbirds use their long beak to eat as much nectar as they can. They need the energy to keep flying.

The wings on a hummingbird can flap up to 200 times in one second. That is so fast that it looks like a blur!

When flying, a hummingbirds heart can beat up to 1200 beats in one minute!

Hummingbirds use lots of energy when they fly and need time to rest. They use their feet to perch and relax.

Name: _____

HUMMING BIRD:

Comprehension Questions

1. How did the hummingbird get its name?

Type here.

2. List the many ways a hummingbird can fly.

Type here.

3. What do hummingbirds eat?

Type here.

4. Where do hummingbirds live?

Hummingbirds live in North America and Central America.

5. What do hummingbirds use their beaks for?

Type here.

6. How fast can a hummingbird's wings flap in one minute?

Type here.

7. How long do hummingbirds live?

Type here.
